

# The Best of Both Worlds: Managing Agile Projects with a Hybrid Approach

By Donna Gregorio

**Abstract:** In today's dynamic project landscape, one size no longer fits all—especially in large-scale implementations. This session explores how a hybrid project management approach blends the best of Waterfall and Agile to deliver structured planning, clear timelines, and the flexibility needed to adapt on the fly. Attendees will gain insights into how hybrid methods support complex, multifaceted projects by aligning cross-functional teams, accommodating evolving requirements, and maintaining overall strategic direction for success. Learning objectives include:

- **Compare and contrast** Waterfall, Agile, and Hybrid project management methodologies to determine the best fit for complex, large-scale implementations.
  - **Apply hybrid practices** to balance structured planning with adaptive execution in projects involving multiple teams and evolving requirements.
  - **Develop strategies** to align stakeholders, timelines, and deliverables while maintaining flexibility and responsiveness throughout the project lifecycle.
- 

Discover how blending Agile flexibility with Waterfall structure through a Hybrid approach can supercharge your project success – especially in complex, high-stakes environments.

## Hybrid waterfall and agile approach
